

Please do not let the networks bully the FCC into adding a broadcast flag to copyright HDTV broadcasts to block the recording of shows with that flag. The way people watch tv these days is with recording shows for watching when they have the time to do so. Not only will copy protection deny the public from watching shows when THEY want to but it will also make ratings drop for the networks costing them advertising dollars because we will be limited in what shows we can tape and be forced to make a choice in what shows to watch live. Thank you.
